

United Citizens Community Checkers

A study guide for voluntary movement, privacy, freely bestowed gratitude, Experience Presence, and the Detente 2030 decision.

Gather. Celebrate. Serve. Scan only if you choose.

Foundational notation

Human presence $\doteq$ one sextillion XP. The dot-over-equal sign expresses a correlation established by human agreement. It does not make XP money or make money equal to human worth.

Prepared as a discussion and behavioral-study guide. It describes proposed gameplay and governance principles. It is not an offer of credit, an investment product, a payment promise, or a valuation of any person.

1. The purpose of the adventure

Oligopoly is a three-level Community Checkers adventure involving identity, trade, and gratitude. United Citizens move through life circle by circle while gathering, celebrating, meeting community needs, and serving others.

Community Checkers never capture the player.
Movement is always voluntary. A person may enter a circle, observe it, leave it, return later, or never scan. No response is treated as a character judgment.

The three-site funnel

Portal	Purpose	Boundary
MEGAvoters.com	Introduces United Citizens, Oligopoly, and the choice to observe or participate.	Invitation portal; not the XP ledger.
LegacyToLiveBy.org	Hosts the Human Gold Rush, FAITH covenant, touchstone RSVP, and LAUGH gatherings.	Community experience; no payment required at LAUGH.
HumanBlockchain.info	Offers the three voluntary QR doors and the privacy-respecting XP presence event.	Presence proof; fiscal settlement stays outside XP.

The FAITH practice

FAITH means Fair, Accepting, Insightful, Transparent, and Humble. It is a personal covenant for relationships, not a tool for scoring someone else. The essential question belongs to each participant: Where do my heart and spirit lead me when I am truly practicing FAITH?

2. The voluntary Oligopoly move

The core interaction is intentionally simple. A device scans one of three QR codes. The person may accept the moment, decline it, observe without posting, or walk away.

Choice	Ledger result	Meaning
Scan and accept	Posts 10 ¹⁸ XP	The device voluntarily recognizes one Experience Presence event.
Observe	Posts nothing	The person may learn, gather, or celebrate without creating an entry.
Decline	Posts nothing	Accepting nothing is absolutely allowed; no explanation is required.
Walk away	Posts nothing	The person may leave without penalty or judgment and come back later.

The three QR doors

QR	Plain-language signal	Boundary
Identity	I am present.	Does not establish public personal identity.
Trade	I helped meet a practical need.	Any fiscal receipt or obligation remains outside XP.
Gratitude	I recognize someone serving or showing up.	XP is never money, cash, crypto, or wages.

Core privacy guideline
The core scan requires no name, login, password, CAPTCHA, email, phone number, or public profile. Discord Gracebook, membership, RSVP notices, and WooCommerce are separate opt-in paths.

3. Gratitude is bestowed

The scan does not create gratitude. A human first chooses to recognize another person’s presence, service, courage, need, or contribution. The seller/giver offers recognition freely; the buyer/recipient owes nothing.

Roles can change at every encounter

Role	Freedom and responsibility
YAM'er observer	Decides whether an observed moment belongs on the XP ledger. May post, observe, decline, or walk away.
Buyer/recipient beneficiary	May accept practical help, gratitude, both, or neither. Owes no data, reaction, or explanation.
Seller/giver benefactor	May bestow gratitude one sextillion XP at a time but cannot demand acceptance or a post.
Patron Organizing Community	Coordinates people and service. A POC supports encounters without owning participants or their choices.
Guild or LAUGH host	Creates a welcoming place for gathering, celebration, service, fulfillment, or an optional open mic.

Limitless gratitude does not mean limitless claims on a recipient. The giver may continue recognizing service and presence. Acceptance remains sovereign. Additional community gratitude may support community surplus rather than becoming a hoarded personal claim.

4. The \$20 thought experiment

Offer the same \$20 to someone in a financial or emotional survival moment and to a billionaire. The amount is equal. Need, meaning, emotion, and behavior may be very different.

Moment	Possible responses	What cannot be concluded
Financial or emotional survival	Relief, dignity, hope, suspicion, discomfort, gratitude, or refusal.	The response does not prove worthiness or character.
Financial abundance	Curiosity, indifference, humility, generosity, discomfort, or refusal.	Wealth does not predetermine gratitude or character.

Gratitude is not the \$20. Gratitude is the freely offered - and freely accepted - human moment.

The money is a behavioral prompt. Oligopoly records a voluntary outcome, not a verdict about either person. The deeper question belongs to the giver: where does my heart and spirit reside when I practice FAITH?

Treasured Penny principle

The Treasured Penny represents choosing the smallest personal recognition rather than racing toward the largest claim. A krill may accept only what is needed personally and allow additional gratitude to support the community. The Easter Egg is not hidden: presence created it.

5. Whales, krill, and two forms of leverage

Oligopoly can compare two strategies without judging the people who choose them.

Whale behavior	Organized Krill behavior
Accumulates assets or claims.	Organizes people and presence.
Borrows against abundance.	Shares gratitude across the community.
May simulate a maximum 70% LTV.	Seeks the Treasured Penny and community surplus.
Creates financial receipts and obligations.	Creates voluntary XP recognition.
Requires reconciliation and settlement.	Requires consent and cooperation.
Measures financial capacity.	Measures Network Weighted Presence.

SmallStreet gameplay boundary

The SmallStreet GitHub algorithm may simulate 70% loan-to-value behavior as a financial-game layer. XP may not serve as real collateral. No scan creates debt, credit, eligibility, interest, custody, a margin call, or a promise of financing.

Illustrative 70% LTV
Reference value: \$100 • Maximum simulated obligation: \$70 • Equity cushion: \$30
This is an educational gameplay relationship, not an offer to lend or borrow.

6. Reconciliation and settlement

Gratitude can be bestowed continuously. Accounting reconciles monthly. Eligible financial activity settles quarterly outside the XP presence ledger.

Cadence	XP / behavioral layer	Separate financial-game layer
At each accepted scan	Post one sextillion XP and an event status.	No automatic financial consequence.
Monthly reconciliation	Review issued, pending, matured, disputed, reconciled, and extinguished presence statuses.	Report receipts, obligations, simulated LTV, and discrepancies.
Quarterly settlement	Close the behavioral-data quarter; XP remains non-cash.	Settle eligible reconciled receipts and obligations through authorized external parties.

Suggested financial status path

Issued → Pending → Matured → Reconciled → Settled → Extinguished
Disputed entries return to human reconciliation before they are settled, carried forward, or extinguished.

Operative LTV concept

$LTV = \text{Outstanding Reconciled Obligations} \div \text{Eligible Receipt or Collateral Reference Value}$
Pending or unverified activity should not consume operative capacity. The algorithm advises; authorized humans decide and perform any real settlement.

7. Detente 2030 and the Genesis Seed

The dot or caret over the equal sign becomes the Detente 2030 notation: two distinct systems acknowledge a relationship without pretending to be identical.

Money ÷ Mankind
Comparable by agreement. Distinct by design.

XP ÷ Human presence
A reconciled social correlation, never a price placed on a person.

The two-day decision

Date	Moment	Authority
May 16, 2030	Reconcile the Oligopoly evidence, including privacy-respecting aggregate outcomes, gratitude patterns, whale gameplay, krill organization, monthly statements, and quarterly settlements.	Evidence and algorithms remain advisory.
May 17, 2030	United Citizens decide what Genesis Seed is planted for BIS 2.0 - Bounty for Inspirational Services - based on the reconciled Oligopoly results.	The final choice remains human.

Oligopoly measures the choices. United Citizens make the choice.

No algorithm, institution, whale, artificial intelligence, or financial balance predetermines the Human Gold value of presence. The Genesis Seed recognizes what United Citizens choose to carry forward.

8. Host and participant guidelines

For hosts

- Welcome participation, observation, decline, no scan, and walk-away as valid choices.
- Do not require a core Oligopoly login, account, password, CAPTCHA, or public profile.
- Keep RSVP, Discord Gracebook, memberships, and WooCommerce clearly separated as optional pathways.
- Explain that XP means Experience Presence and is never money.
- Do not interpret a scan, refusal, silence, emotional response, or financial condition as character evidence.
- Count only the minimum aggregate outcomes needed for the study and protect private stories.

For participants

- Move only when you choose. Pause, observe, decline, or leave whenever desired.
- Choose Identity, Trade, or Gratitude only when its plain-language meaning fits the moment.
- Accepting nothing is always allowed. You owe no explanation.
- Give without demanding acceptance, recognition, repayment, or a particular reaction.
- Remember that roles are flexible: you may give in one circle and receive in another.

Discussion questions

- What changed because people gathered and served?
- What did the scan reveal that attendance alone did not?
- When did gratitude create community capacity?
- How did whale leverage and krill organization produce different outcomes?
- What evidence should United Citizens carry forward on May 17, 2030?

Closing guideline

Move when you choose. Pause when you need. Walk away without judgment. Come back when curiosity returns.
